

# Professional Blockchain Course

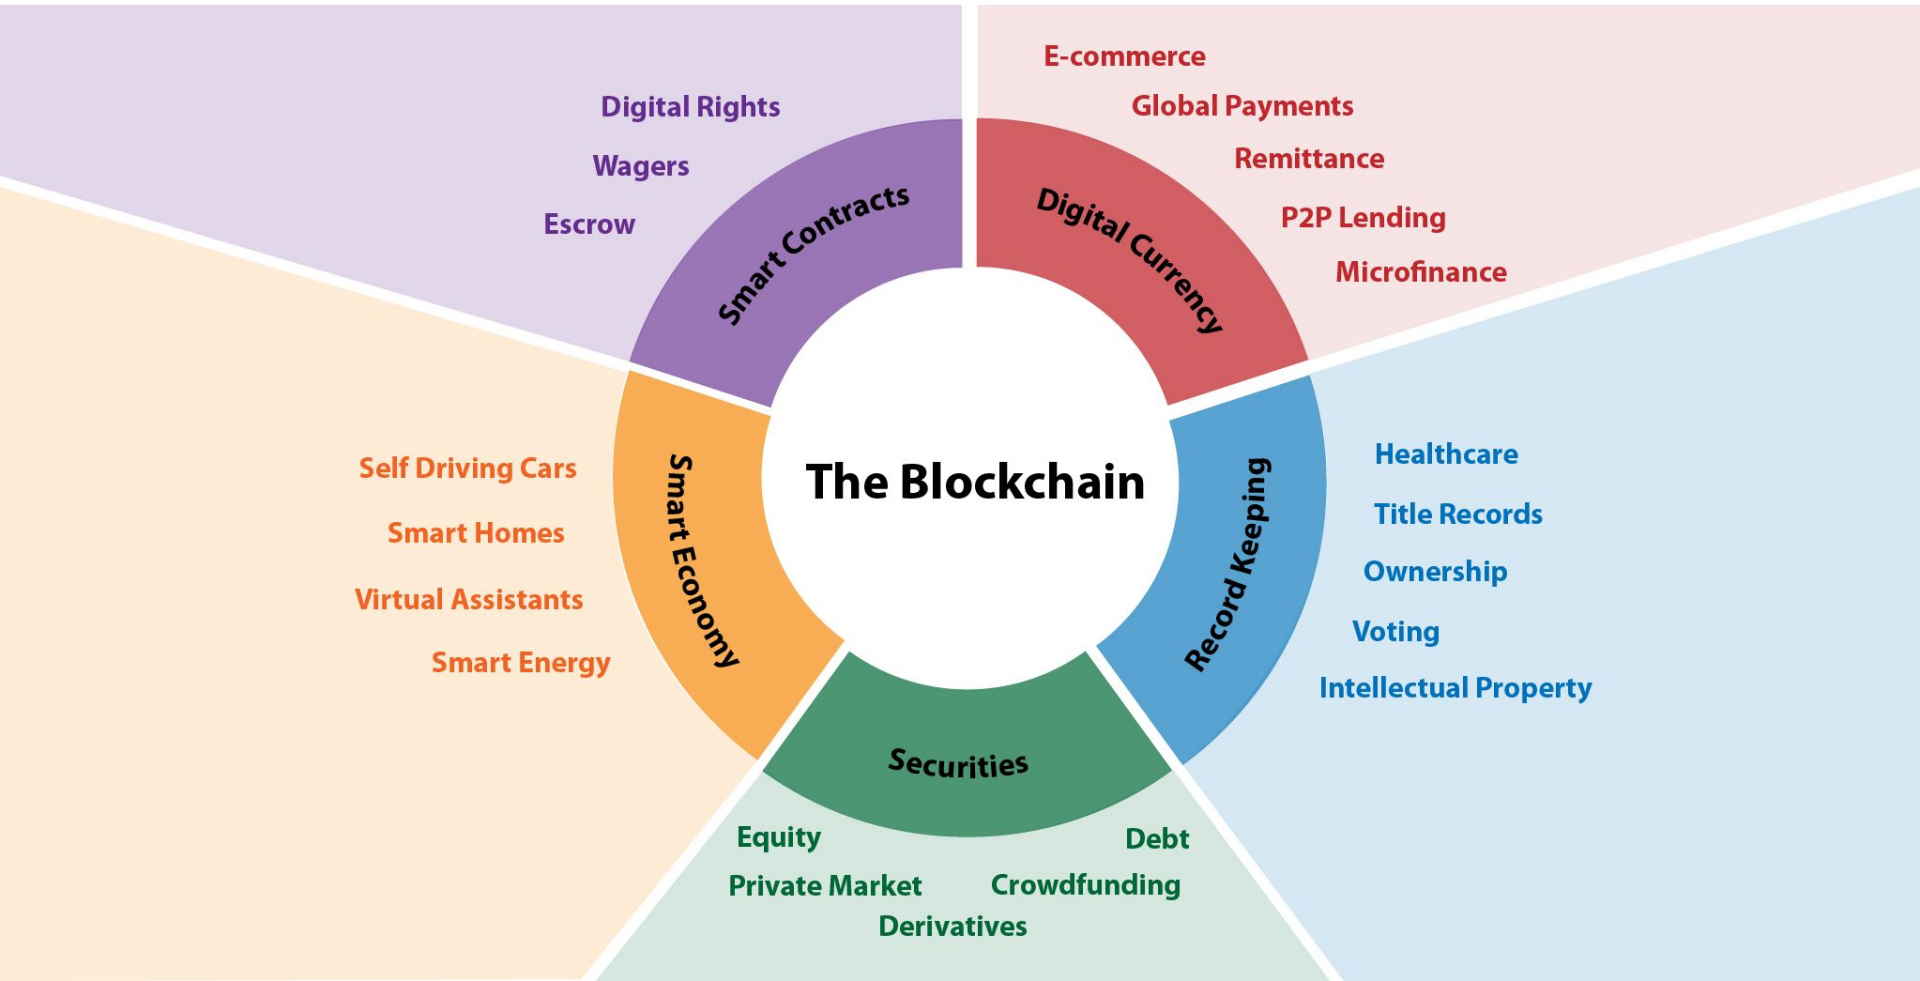

Future Scope - Potential Future Applications

# Current use of Blockchain by different sectors

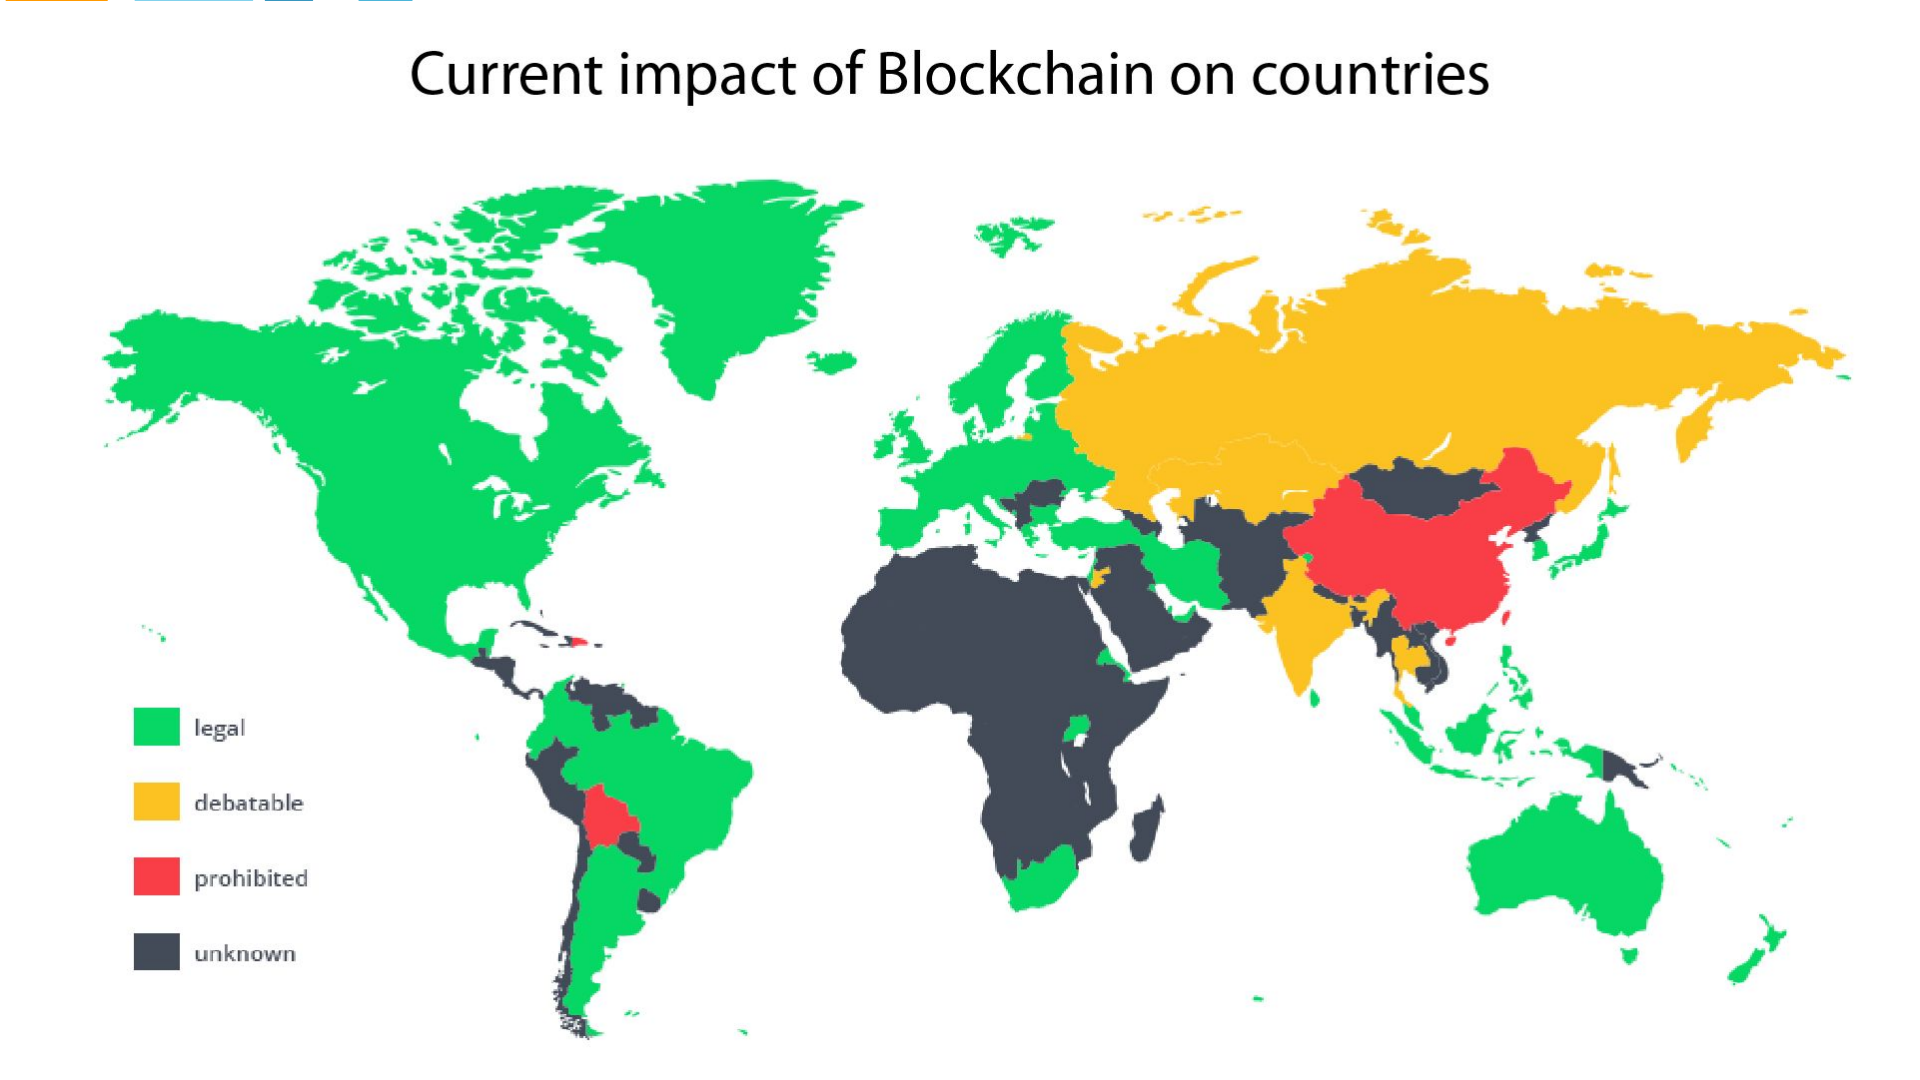

# Potential use of Blockchain

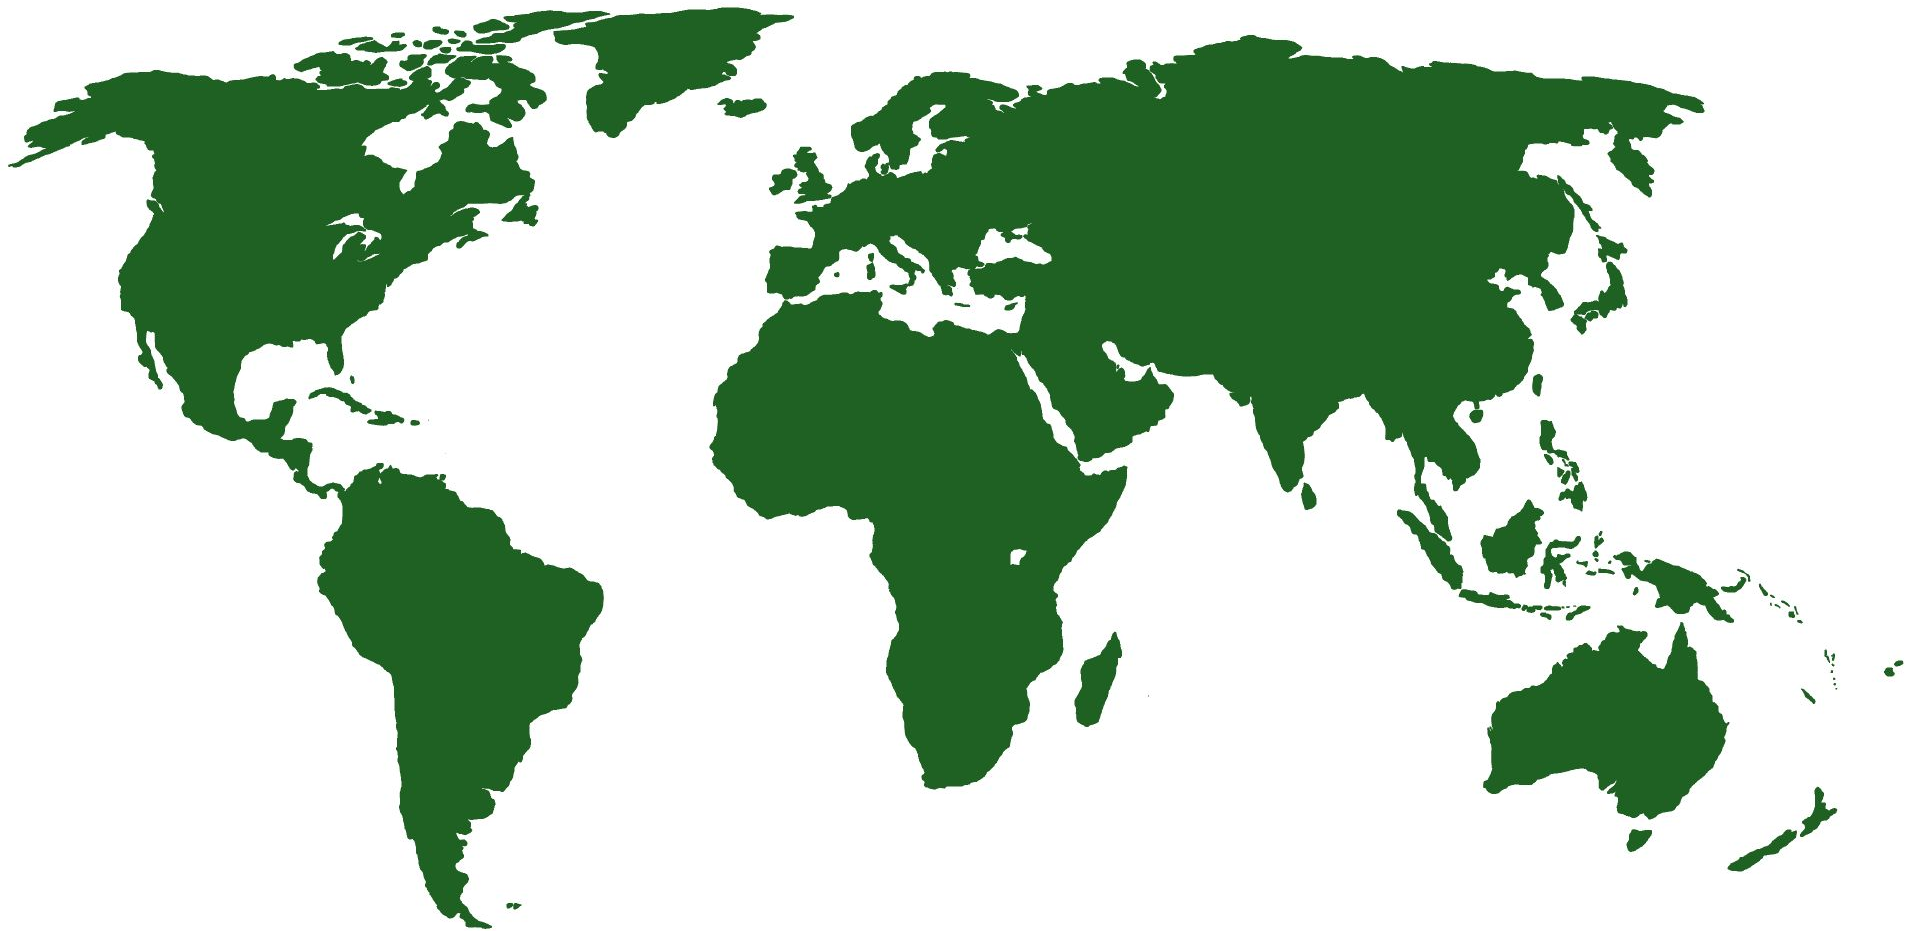

## Current impact of Blockchain on countries

A world map illustrating the current legal status of blockchain technology across various countries. The map is color-coded according to the following legend:

- legal** (Green): Countries where blockchain is legal, including Canada, the United States, most of Europe, Australia, and several countries in South America and Africa.
- debatable** (Yellow): Countries where the legal status is debatable, including Russia, India, and parts of Southeast Asia.
- prohibited** (Red): Countries where blockchain is prohibited, including China and Venezuela.
- unknown** (Dark Grey): Countries where the legal status is unknown, including most of Africa, parts of South America, and several countries in Asia and the Middle East.
